Introduction

About

BUYAX Kitchen is a restaurant that you want to keep coming back to. The brand is an Italian-Middle Eastern Fusion restaurant that also sells Filipino classics. What started as a delivery-only food service from home grew into a staple restaurants that locals keep coming back to.

At the heart of BUYAX Kitchen is the commitment to providing elevated and quality food at an affordable price.

Logo System

Primary Logo

The logo is the foundation of the brand identity. It represents BUYAX Kitchen at a glance and ensures instant recognition across every medium. As the most visible element of the brand, it should always be used with care and consistency.

This primary logo is the preferred version and should appear in all main communications whenever possible.

To maintain impact, the logo should never be altered, stretched, or redrawn. Always use approved files and follow the guidelines on spacing, size, and placement.

Variations & Lockups

To ensure flexibility across different formats and applications, the brand identity includes approved logo variations and lockups. These variations are designed to adapt to a wide range of contexts while maintaining consistency and recognition.

The primary logo should be used whenever possible, but alternate lockups, such as horizontal, vertical, or symbol-only versions, may be applied when space, scale, or layout requires.

Always use the official artwork provided. Do not create new lockups or adjust spacing manually.

Clear Space & Minimum Size

Equally important is the minimum size. To maintain clarity and recognition, the logo should never appear smaller than the specified minimum size, whether in print or digital formats. Using the logo below this threshold risks losing legibility and weakening the brand's presence.

Incorrect Usage

Altering or distorting the logo alienates the audience from the brand. Adding effects makes the logo look muddled and changing the colors departs from the brand itself.

Following the logo guidelines ensures that the brand identity is kept consistent and preserved.

✗ Do not resize the mark

✗ Do not rotate the logo

✗ Do not change the color of the mark alone

✗ Do not outline the logo

✗ Do not reverse the lockup

✗ Do not add gradients to the logo.

✗ Do not distort proportions

✗ Do not place the logo on busy backgrounds

✗ Do not add effects

BUYAX color palette consists of earthy browns and solid shades. It evokes a sense of nostalgia and emulates a vintage look. It also grounds the brand with its Filipino roots; the color palette incorporate the physical identity of the brand with its bamboo and wooden decors.

Typography

Primary Typeface

Typography is a core component of the brand’s identity. The chosen primary typeface reflects the brand’s character.

This typeface has been selected for its personality, uniqueness, and timeless design.

To maintain consistency, the primary typeface should be used across print, digital, and environmental media. Always apply it thoughtfully, respecting hierarchy, spacing, and accessibility.

Secondary Typeface

The secondary typeface is designed to complement the primary font and provide additional versatility. SF Pro was chosen for its simplicity, cleanliness, and versatility.

This typeface is best used in supporting roles like subheadings, captions, pull quotes, or editorial layouts, where variety and visual comfort is needed. When combining both typefaces, always maintain clear hierarchy and readability.

Graphics

Graphics Style

These are the visual components that support the brand and improve its brand recognition. Also, these components include recognizable graphics, patterns, icons, and forms.

These components enhance the design of the overall branding. Patterns are recurring designs created from brand components that follow the standard color and graphics.
